

Wolf Motor Away

In this adventure, Wolf Cub Scouts will explore how they can use the air in their lungs, the strength of their hands and the power of imagination to make things go!

What makes a boat float?

Wolf Cub Scouts design and then test out their boats, using their own “wind” power!

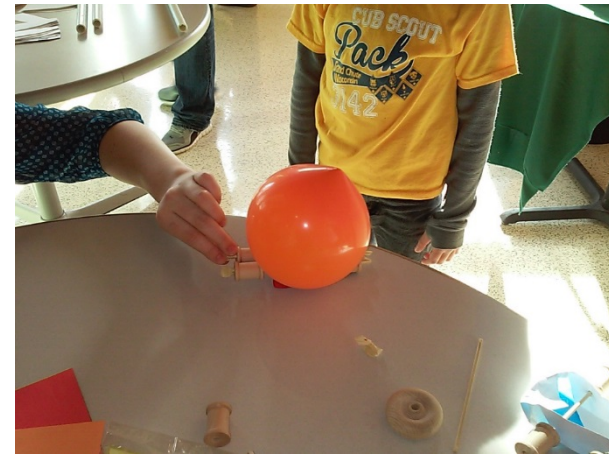

What makes an airplane fly? Wolf Cub Scouts create several paper airplanes and test them out while learning all about Bernoulli's Principle.

Testing predictions: how far does the airplane fly when launched with a catapult

Hands-on learning

**With a
helping
hand**

Air of the Wolf Adventure

Air is all around us. In this adventure Wolf Cub Scouts will learn how amazing it is!

Does air have weight? How does air help move things?

Balloon rockets, kites and wind instruments are all part of having fun with air!
